Letter of Recommendation

I know Mr. Vasileios-Evangelos Apostolou from 2022, as his professor in the courses on “Fluid Dynamics” and “Physical Oceanography” at the Department of Physics in the University of Athens. He was an excellent and hardworking student. Both faculty and his fellow students have collaborated productively with him.

During my courses he made good progress (top 10% of the about 700 students taking the courses the last three years). In my courses, he demonstrated the ability to understand, he participated with success in all courses activities and he received excellent grades (9/10 and 8/10, respectively).

Overall, Mr. Apostolou’s scientific understanding and academic dedication show the potential for a successful graduate student and/or researcher.

Yours sincerely,

Sarantis Sofianos
Associate Professor
Coordinator of the
Ocean Physics and Modelling Group
